**Subject:** The proposed settlement is the worst thing yet

I am forced to deal with Microsoft and their monopolistic ways on a daily basis. I cheered when it appeared that the DOJ would finally do something about the monopoly. And then you sold out to Microsoft. Make no mistake, if you go through with this settlement, the computer industry will get even worse... and the economy with tank even more. Please reconsider your settlement. It gives Microsoft even more loopholes without doing anything about their anti-competitive practices. Thank you for your time.

Sincerely,  
Graeme Gott
